Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Santbrink et al.

Van Santbrink teaches a method and system for contactless exchange of information between a read/write unit and at least one information carrier, using wireless radio frequency signal transmission including an input/output circuit and associated coil device, and each further including a processing circuit. In the figure on the front page of the patent, element 23 is a FET.

Allowable Subject Matter

Claims 2,3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
